"*Simple Cat 5, 6, 7 cable tester for everyday use*"

Easy to operate LAN tester!

Local Area Network cabling faults can be difficult to diagnose - unless you have the CZ20250 and CZ20350 ! These easy to operate LAN testers enable you to test your wiring and connections at installation or after maintenance, and are great Cat 5, Cat 6 and Cat 7 cable testers, making them the most convenient tools on the market.

Ideal for working on site, these testers are rugged and compact, being constructed to withstand the harsh environments encountered by electricians on a daily basis.
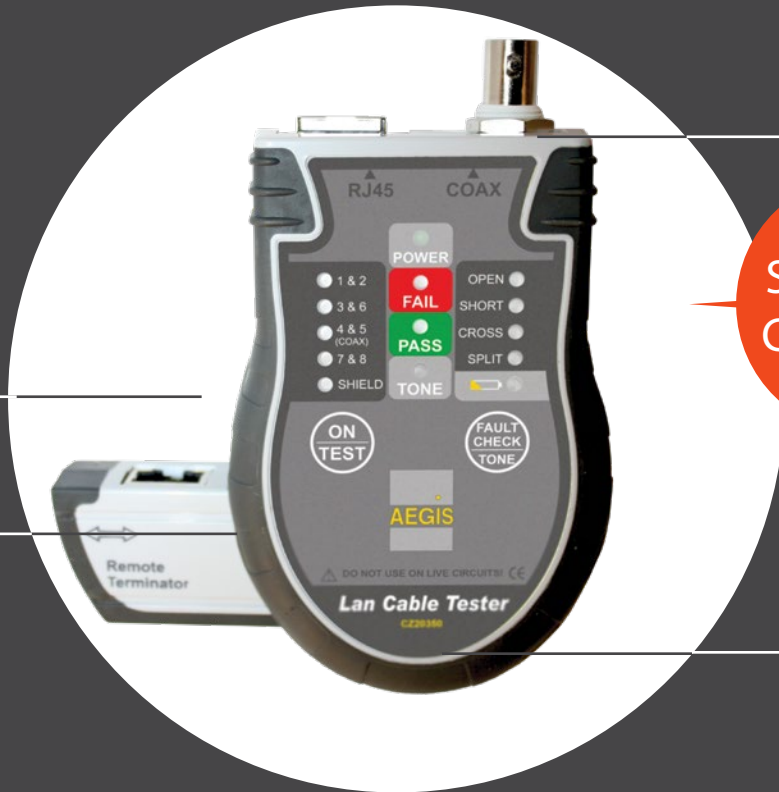

With the press of a single button you can automatically run a barrage of tests, including tests for Continuity, Opens, Shorts, Crosses and Splits. You can also identify which pairs require correction;. With the CZ20350 you can also test coax continuity and generate a tracing tone for cable identification.

The unit will scan all combinations without you having to do anything other than initiate the test. Tests are performed at lightning speed, saving you as much time as possible.

LAN Tester

The CZ20250 and CZ20350 are comprehensive wiring testers for all LAN networks built for everyday use by electricians and IT professionals worldwide. These testers have been designed with the knowledge and experience of a test equipment company that has provided tools for the data and networking trades for many years.
