

PatrolPro

“Two portable appliance testers in one.”

Easiest to use PAT on the market.

Protect yourself and your employees by ensuring that your portable electrical appliances and equipment are tested for electrical safety to AS/NZS 3760:2010 with the CZ5001 Patrol Pro.

The Aegis Patrol Pro is a reliable portable appliance tester (PAT) and is an essential piece of equipment for every workplace. You can make sure that your business is complying to OH&S standards by testing all of your electrical appliances with the Patrol Pro.

It will perform the essential electrical safety tests required for portable appliances and equipment, and can be used to test domestic appliances, industrial appliances, power tools, electrical portable outlet devices and extension leads.

The Patrol Pro also performs earth leakage testing. It is designed to meet Australian and New Zealand safety requirements.

PatrolPro

The CZ5001 Patrol Pro can operate from batteries or from a 240V AC supply, adding to its convenience. Building on the simplicity of the CZ5000 Patrol, the PatrolPro is the simplest 'run test' capable PAT on the market. Everything is tested to the Australian and New Zealand Standard (3760) relating to appliance testing.

01

All components of the Patrol Pro are contained in a waterproof, drop proof case

02
